

Protected business **Managed Backup**

Do you need to backup business critical data effortlessly?

Do you require pay-per-use licenses?

Do you require the ability to increase the number of resources?

Do you require a solution that allows you the ability to replicate to a fully redundant environment?

Liquid Telecom's Managed Backup solution allows customers to backup and replication all business critical data to a Tier 3 data center. All data is backed up and replicated within African Data Center either in Johannesburg or Cape Town.

Both Data centers offer fully redundant power and backup power solutions to enable 100% ability to back data up and replicate data. Liquid's customers can scale their virtual backup environments to meet their business needs and pay only for the licenses that are used to support their need.

What is Managed Backup?

Managed Backup offers Liquid Telecom's customers the ability to backup and replicated business critical data effortlessly at any time. Once the initial data back is completed, customers can set up their daily, weekly or monthly scheduled backup's. Customers will defined the exact time backup's are executed.

The Liquid Telecom Managed Backup is powered by Veeam Software. Managed Backup offers:

- Offers fast and reliable backups for all customer workloads
- Ability to generate fast backups from snapshots
- Manage all virtual backup needs using VeeamONE
- Restore Virtual machines or individual files within minutes

Liquid Telecom's Managed Backup product incorporates Backup and Replication offers customers the ability to restore their entire environment from a snapshot; restoration for individual files, entire Virtual Machines or applications as required to achieve and attain low recovery time objects.

- Instant recovery enables entire Virutal Machine restoration within minutes
- Scheduled backups
- Data backup with full encryption through data de-duping
- Data retention for 90 days on NLSAS. Longer retention periods available on request

Replication

Liquid Telecom delivers advanced image based replication of backup data. Mission critical data is easily replicated to either of the African Data Centers.

Managed Backup

Benefits:

- Backup data easily to a Tier 3 data center
- Schedule incremental backups to meet customer specification
- Snapshots allow for easy restoration of virtual machines
- Restore environments, applications, or Virtual Machines
- Image based Virtual Machine replication for High Availability
- Reduce the cost of ownership for customer on-premise backup environments
- Multiple backup copies in different locations

Customers are able to view their environments by means of their unique web-based interface. They can test, delete and restore entire Virtual Machines within minutes. Customers benefit from a high availability solution.

Support

Liquid Telecom has physical presence in several African countries, giving you access to people on the ground who understand your market and needs.
