

Transformed business Colocation

Relocate your IT infrastructure to the interconnected, carrier and cloud neutral Liquid Telecom data centres facilities; and gain access to a hub of leading cloud providers, carriers and enterprises. Our Data Centres are strategically located at major regional trade hubs; and provide a secure and reliable home for all your business-critical data, thus providing you with the foundations for your company's digital transformation. With our cost-effective Colocation, 24/7 onsite support capabilities with global skills located in our data centres, you know your data is in good hands.

Our Colocation service is available in options from as small as 4U's, to full racks and even caged footprints, giving you options and scale as your demands grow.

How does Colocation grow your business?

- You are more responsive to business needs by removing the distraction of managing and maintaining an IT environment.
- Your staff are focused on core business services, while enjoying peace-of-mind knowing that your IT systems are fully secured 24/7/365.
- You spend less on capital expenses while enjoying state-of-art data centre facilities and services.
- You get access to expert support from our on-site engineers. Ensuring your servers are available even when your team isn't.

What can you expect from Colocation?

Liquid Telecom Colocation service is ideal for Data Centre outsourcing and disaster recovery, allowing you to house your IT equipment, data or applications in our interconnected, secure, and reliable data centres without taking on the costs and maintenance of in-house infrastructure – and pay only for the power you use.

Our Colocation service caters for any size of business and is available in options from as small as 4U's, to half/full racks and even caged footprints, giving you options and scale as your demands grow.

We can also design and build customized, secure and fully independent computer rooms to facilitate your exact hosting requirements while maintaining complete separation from the general hosting areas.

Key benefits to using Liquid Telecom's Colocation:

- **Choose the connectivity provider of your choice** – LTSA data centres are carrier and cloud neutral facilities; and allow you access to a variety of telecom, dark fibre and cloud providers to choose from, for your all your connectivity requirements
- **Optimise performance with Liquid Telecom's most peered fibre network** – LTSA Connects you to the most advanced network technologies in the country, with fast, scalable connectivity and a range of optional network features to support your business.
- **Only pay for what you use** – bring stability to your budget with predictable monthly expenses on space and power capacity; and save the expense of having to build and maintain your own data centre. Plus pay only for the power you use per rack.
- **Get access to unlimited hosting bandwidth** with Burstable per GB Hosting Bandwidth, on a pay for usage basis. In addition, LTSA VPN Customers get access to a free MPLS Aggregated port in the data centre
- **Keep your data and equipment near you** – our data centres are strategically located at major regional trade hubs, providing you a home (near you) for all your business-critical data and access to a hub of leading cloud providers, carriers and enterprises. In addition, geographical diversity gives you more options for production and disaster recovery requirements.

Colocation

- **Get the capacity to scale and grow** - No matter your size we can accommodate your requirements, from 4U racks, Half/Full Racks to large dedicated rooms.
- **Interconnect with JINX and CINX** in our Data Centres (no Monthly cross connect charges).
- **Free your IT team from day to day data centre administration** - Make better use of your inhouse IT resources and improve efficiency and productivity by relying on the LTSA technical expert team and advanced data centre technology

Take advantage of our value-added services:

- Our Data Centres are Carrier neutral, open access facilities allowing you to have a variety of telecom and dark fibre providers (including Liquid Telecom) to choose from, for your connectivity requirements. Our **Meet Me Rooms (MMR)** provide these providers with the facility to interconnect with other telco operators and Internet Exchanges (as well as other customers in the Colocation areas) at affordable rates. **Cross Connects** allow your business to quickly and easily interconnect with telco operators and Internet Exchanges present in our data centre Meet Me Rooms.
- **Remote Hands Support** allows you access to our onsite technical support team.
- Burstable per Gigabyte **Hosting Bandwidth, a pay as you use** hosting bandwidth, for access to multiple gigabits per second of internet speed, without any shaping or caps being applied to the internet traffic. Because of the dynamic bandwidth provision demand required with using data centre services, Liquid Telecom offers **usage-based billing for peak capacity required beyond the committed capacity**.
- **Managed Storage** provides you with flexible storage tier options enabling you to drive cost efficiencies by choosing the storage disk/type that best suits your business application needs.

Why Liquid Telecom Colocation.

- **Rely on our expertise** - Our global-skilled and experienced technical data centre experts can design, integrate and fully manage data centre solutions that deliver the best possible performance for your business, backed by 24x7 support
- **Flexibility and simplicity** - Create hybrid architectures by connecting your secured racks with Liquid Telecom networks and cloud services. We offer a full range of Hosting services, anything from Colocation to Cloud, customers can mix and match to suit their needs
- **Exceptional Reliability with our Most Peered fibre Network** - Our Data Centres are strategically positioned and located at the heart of our most peered fibre network, offering customers the highest network availability from our data centres to any location nationally and globally

About Liquid Telecom Data Centres.

Designed, built and operated to the highest standards demanded by today's leading cloud providers, carriers and enterprises, our Data Centres provide businesses with peace-of-mind, regardless of the scale of requirement.

With an abundance of local and international carriers as well as leading cloud and content providers physically connected or located in our facilities, our Data Centres are an integral part of Africa's largest and most-peered open access network - **The heart of Africa's digital transformation.**

Liquid Telecom, your digital transformation partner

We believe in the ambition and potential of the African business. That is why we combine our expansive reach, reliable, high-speed connectivity, state-of-the-art data centres and innovative digital solutions to augment your digital experience. Because we are not just a telecoms company, we are your digital transformation partner.
